## II. CNC Cutting Machines

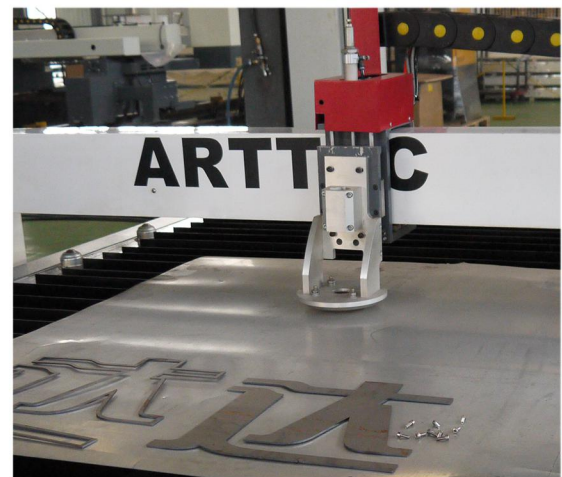

### 3). Table CNC plasma cutting machines

--RateTech Arttec

With plasma THC, platen and water jacket units, RateTech Arttec can cut as thin as 0.3mm plate to as thick as 25mm plate.

Main technical parameters of **RateTech Arttec**

Type	RateTech Arttec
Input voltage	220V/110V, single phase, 50Hz
Input power	3KW
Cutting thickness	Depend on plasma cutters
Effective cutting range	1500*3000 Other size is optional
Position accuracy	0.2mm
Repeatability	0.2mm
Cutting modes	Plasma
Cutting speed	0-8000mm/min, 0-16000mm/min
Torch height control system	Plasma
Cutting thickness	Platen / water jacket: 0.3-5mm Torch height control system: 1-25mm
Drive mode	Dual step drive
Ignition mode	Non-contact ignition
Cutting software	IBE / FastCAM basic version; FastCAM professional version (optional)
Cutting material	Carbon steel, stainless steel, copper alloy, nickel alloy, titanium alloy, etc.
Plasma cutter (optional)	Hypertherm, Victor, TopTech JCH series plasma cutter

**Professional cutting solutions**
